

Loonnnggg thing rolls through town

Written by Holyoke Enterprise

The intersection of InterOcean and Denver was temporarily shut down at noon Tuesday, Jan. 24 when this very long mechanism rolled through Holyoke. It's not real clear as to what the piece of equipment is and city officials were only notified that the crew would be coming through Holyoke. The oversized load was traveling north into Holyoke before heading west on Highway 6. The numerous trailers were specially maneuvered so the massive piece of equipment, estimated to be over 400 feet long, could make the turn at the stoplight. ☐☐ —Enterprise photo
